D: 3.14 INCHES

LIVE EDGE PAROTA WOOD COFFEE TABLE

Parota is particularly desired for its bold, striking wood grain, which resembles Acadia or Koa wood in appearance but with more texture and consistent colouring.

These traits make our live edge coffee tables, made from a solid slab of Parota, provide distinction & style to any living room.

All of our tables are finished with a hard sealer for a durable natural finish to protect the wood and create a lasting piece.

Sizes range from 48" to 60"L x 32"W x 3" thick resting on solid Parota wood legs. Also, specified measurements can also be arranged and customized to your needs.

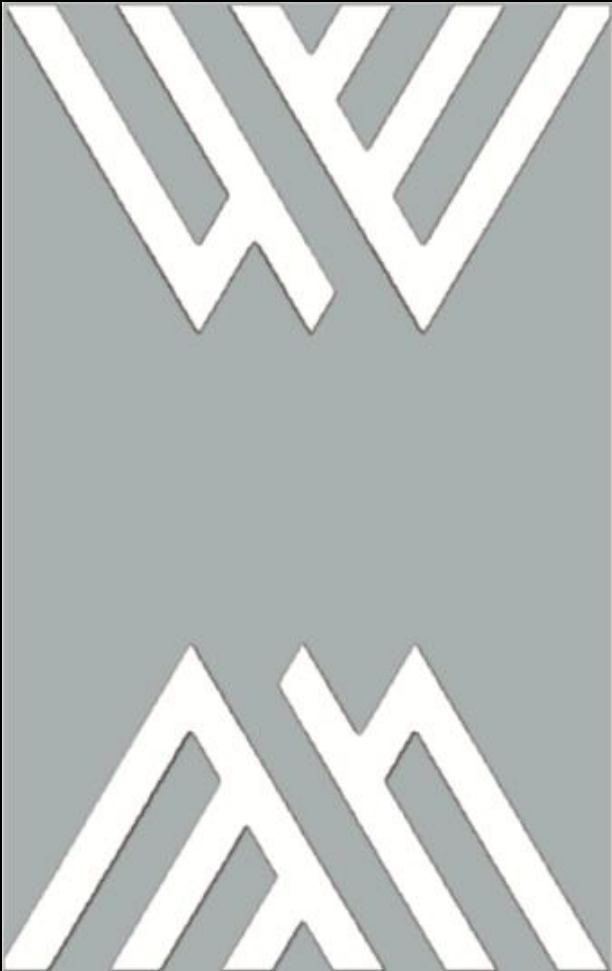

LIVE EDGE PAROTA WOOD DINING TABLE

As the Parota tree is a much faster growing species, the density is lighter, comparable to a Redwood or Mahogany. This makes it ideal for large furniture or projects such as our live edge dining tables which are made from a solid slab of Parota.

This table is finished with a hard sealer for a durable natural finish to protect the wood and create a lasting piece.

Sizes range from 84" to 120"L x 40-42"W x 3" thick resting on solid Parota wood legs. Also, Specified measurements can also be arranged and customized to your needs.
